

# Photovoltaic Actuator

## General Information

- Apply to Photovoltaic Linear Actuator (Mechanical linkage structure)
- Dynamic load and speed, supporting customization

## Specification

|                              | Unit | EX35SA19C                 |
|------------------------------|------|---------------------------|
| Max. Dynamic Load            | KN   | 15                        |
| Max. Static Load             | KN   | 65(Half Stroke)           |
| Load Speed                   | mm/s | 4                         |
| Stroke/Installation Distance | mm   | 800/1120(Customizable)    |
| Top Clevis Aperture          | mm   | 20                        |
| Type of Clevis               | -    | Movable clevis (Optional) |
| IP class                     | -    | IP66                      |
| Salt Spray Test              | h    | 480                       |
| Operating Environment        | °C   | -30~+60                   |

## Mechanical
